

Project Title: Skill Sync

What is your idea and what makes it new?

Skill Sync is a user-centered social platform designed to connect individuals based on their skills and interests. Users can create accounts, post skill-related content, follow others, interact through likes, comments, and shares, and manage their own profiles. What makes Skill Sync new is its **focused integration of skill-based networking** with common social media features, encouraging learning and collaboration in an interactive and supportive environment.

Unlike general social platforms, Skill Sync is tailored specifically for users who want to **share their skills, learn from others, and build a skill-based community**. With features like category selection, saved posts, and a personalized feed of suggested users, Skill Sync promotes meaningful connections and skill development.

Target Users

- Students and young professionals looking to share and grow their skills
 - Hobbyists seeking a community around shared interests
 - Educators and mentors who want to engage with learners
 - Job seekers aiming to showcase their talents
-

Interaction Method

Users interact with the platform through:

- **Login/Register/Password Reset:** Secure access to the platform
- **Home Page:** View posts, like/unlike, comment, share, follow users, and save posts
- **Admin Dashboard:** Manage personal data, edit profile info, and view post history
- **Navigation Bar:** Quick access to search, dashboard, and sign-out
- **Category Selection Page:** Customize feed based on interests

All interactions are designed to be intuitive, accessible, and responsive across devices.

Expected Outcome

We aim to create a digital space where users can:

- Build a personal brand through skill-sharing posts
- Discover and connect with people of similar interests
- Stay organized with saved content and personalized feeds
- Gain motivation and feedback through community interaction

Team Roles

1. **Hset Yiu Paing** – Designer
2. **Mee me** – Research & Interaction Design (HCI focus)
3. **Wai Phyو Aung & Enoch Htun** – Testing, Documentation & surveys
